

## Current List of AI Tools to Share

*Note: IHL has no relationship with any of these companies or tools. This is just for your reference and help. Items in Red we have found very helpful. Items in Red we found most helpful.*

**Using ChatGPT text to Word to a PowerPoint Presentation. Create a presentation in 5 minutes. This is all the steps of the sample business plan I shared.**

**Here is the cheat sheet.**

<https://www.patreon.com/posts/chatgpt-to-step-78979900>

The video is here <https://youtu.be/cR17UBRa47Q>

The video that I shared for our business plan example.

<https://www.dropbox.com/s/dolrqhu6juijzyu/AI%20Examples%202.mp4?dl=0>

The PPTX of the business plan example.

<https://www.dropbox.com/s/xmnx0l7cia3fqk4/New%20SaaS%20Pricing%20Tool%20for%20Retailers.pptx?dl=0>

The link to the IHL Test Example of querying IHL content (Just 4 documents) Returns, Inventory Management, Amazon Households, Impulse Items. <https://myaskai.com/share-ask-ai?i=gSmim1y23DZLvSUVI3Jr21vzohsVKh&n=Test>

Some great videos to get started. Some of these tools are free, many really low cost.

**What is coming with Microsoft Copilot**

<https://youtube.com/playlist?list=PLXPr7gfUMmKxDKxah3zpG4NhhDj-2lAvc>

**Best of 200 AI tools tried – will show a lot of the links below in examples.**

[https://youtu.be/gpP\\_YEv\\_9jA](https://youtu.be/gpP_YEv_9jA)

**Supercharge ChatGPT with extensions** - <https://youtu.be/JBAkqDbTh0I>

Intro to ChatGPT for Beginners <https://youtu.be/gyA0RWm32UA>

**WebChat GPT – adds current web search to Chat GPT**

[https://youtube.com/shorts/J\\_A-wsGYEQ?feature=share](https://youtube.com/shorts/J_A-wsGYEQ?feature=share)

Browse AI tutorial <https://www.youtube.com/watch?v=n0vprnge9eA>

Speechify - <https://speechify.com/> - turns any page into an audio book

**Add ChatGPT to Google Sheets** – Andy Laudato shared this

<https://www.dropbox.com/s/n237x4ypspv6nmd/ChatGPTGoogleSheets.mp4?dl=0>

### Some Chrome/Edge Extensions

**Glarity Summary for YouTube:** Will summarize key points of a YouTube video for you, saving tons of time.

**WebchatGPT.** Adds current web pages to ChatGPT

**Cheatlayer:** Allows you to create steps with no code, for Ai to follow and repeat. So pull all prices from Amazon for a product and put in a spreadsheet.

## AI tools

HARD DATA, **SMART** DECISIONS

**MyAskAI:** <https://myaskai.com/> – can upload your knowledge base on anything and make it available for query. Basically a ChatGPT for the knowledge you want to give it and ONLY what you want to give it so eliminates the errors. Upload PDF, Txt, CSV, or list links to specific websites.

**SlidesGPT:** <https://slidesgpt.com/> Creates PowerPoint Presentation from link or PDF or Document. Create presentation from any webpage.

**Fireflies:** <https://fireflies.ai/> Will take notes from your live zoom meetings and highlight To Do's, key points and action items.

**IngestAI:** <https://ingestai.io/> - Makes a database of you and your knowledge in a database searchable by the team – so they can query your knowledge and it answers as how you have answered previously.

**Tango:** <https://www.tango.us/> - Creates easy how-to guides by recording the steps you take and automatically inserts a screen capture every time you change screens.

**Canva:** <https://www.canva.com/> - graphics – this has been out there awhile but great for making and adjusting graphics.

Hoppy Copy: <https://www.hoppycopy.co/> - For marketing and PR. Helps create conversion emails, strategies, etc.

Viralviews: <https://www.viralviews.co/> - Shows what is trending in the key areas of interest that you have.

**Papercup:** <https://www.papercup.com/AI> Powered Dubbing - provides subheadings for your content in different languages. So video in English can have subtitles in any language you want for further exposure.

NVIDIA Canvas: <https://www.nvidia.com/en-us/studio/canvas/> turns your basic drawings into graphics

**NVIDIA Broadcast:** <https://www.nvidia.com/en-us/geforce/broadcasting/broadcast-app/> basically works with you so that you can read a script but the video is corrected so your eyes are looking right at your camera

NVIDIA Omniverse: <https://www.nvidia.com/en-us/omniverse/> - helps you easily create 3d renderings

Versy: <https://www.versy.ai/> - Transforms text into virtual experiences

Imagen: <https://imagen.research.google/> - Text to image model like Dalle

Kaiber: <https://www.kaiber.ai/> - Tranform your ideas or dreams into virtual reality – characters, movies.

Leia Pix: <https://convert.leiapix.com/> - takes images and turns them into animations

RunwayML Gen 2: <https://research.runwayml.com/gen2> - turns basic movies into broader AI compilations

Caktus: [https://www.caktus.ai/caktus\\_student](https://www.caktus.ai/caktus_student) - organization tool and creative area for students from writing to coding to job applications

Wisdolia: <https://chrome.google.com/webstore/detail/wisdolia/ciknpklcipibmfbgjmmdmfdalklfdlne> – Creates flash cards for any content for memorization.

Rewind: <https://www.rewind.ai/> - Turns all your browsing into a searchable DB to quickly find what you saw several days ago.

Pimeyes: <https://pimeyes.com/en> - reverse image search

Deep Nostalgia: <https://www.myheritage.com/deep-nostalgia> - animates old photos.

**D-ID:** <https://www.d-id.com/> - Create digital spokesmodels with scripts.

RunwayML: <https://runwayml.com/> - Turn text into pictures and movies or anything you want.

**Luma Labs:** <https://lumalabs.ai/> - think the typical 3d rendering for retail items, but you can do with anything. How would this look in the back yard, or on a mountain...

**Notion:** <https://www.notion.so/product/ai> - makes you more productive by summarizing emails, meetings, notes, documents into bulleted points.

HARD DATA, **SMART** DECISIONS

Wist Labs: <https://wistlabs.com/> - turns your videos into 3d videos that can be rotated (like you see people do on TV crime shows)

**AutoDraw:** <https://www.autodraw.com/> - lets you start to draw something, and it corrects it into what you really want as if you were an artist

**Reimagine Home:** <https://www.reimaginehome.ai/> - let's you completely reimagine a space. Like remodeling a kitchen or living room – HUGE for home goods

Do Not Pay: <https://donotpay.com/> Robot lawyer to fight corporations, speeding tickets, you name it. Can write legal brief, lawsuit, etc.

**Soundraw:** <https://soundraw.io/> Royalty-free music from your text prompts that you can use for videos

Mubert: <https://mubert.com/> - Similar – creates music for videos, podcasts, etc.

**Eleven Labs:** <https://beta.elevenlabs.io/> - Records your voice and trains on your voice. Then you can enter a script and it will read it in your voice.

**Midjourney:** <https://www.midjourney.com/home/> - creates incredibly detailed photos from text. Can be used to create dashboard ideas.

**Mixo:** <https://mixo.io/> - helps to quickly to build a new business complete with taking the idea, building business plan, website, etc.

**Jasper:** <https://jasper.ai> – this is considered a better writing tool than ChatGPT

Looka: <https://looka.com/> - helps turn your company name and business idea into a brand

**Poly:** <https://poly.ai/> - create scripts and answer in your own voice. Consistently create your best brand experience.

**Synthesia:** <https://www.synthesia.io/> - creates videos from plain text in minutes with AI spokesmodel

**Tome:** <https://beta.tome.app/> - Great at creating presentations from text template

**Browse.ai:** <https://www.browse.ai/> – no code tool to scrape any website and put into structured CSV file.

Future Tools: <https://www.futuretools.io/> - Encyclopedia of AI Tools

**Quillbot:** <https://quillbot.com/grammar-check> Takes AI generated text, and changes it to make it look less like it was generated by AI – sort of ironic.

**Legalese Decoder:** <https://ai-tools.irocket.vc/tools/legalese-decoder/> takes confusing legal language from contracts and explains in plain English.

**Megaphone:** <https://megaphone.spotify.com/> Pushes your podcasts to all the platforms. You may be using this already.

ContractReader: <https://www.contractreader.io/> - Read and understand smart contracts with AI

**Opus:** <https://www.opus.pro/> - Video editing tool that turns your long videos into many viral short videos (link)

**InsightBase:** <https://insightbase.ai/> - Chat with your database and build dashboards

Wonderchat: <https://wonderchat.io/> - Instantly builds chatbot from your content

**Autory:** <https://autory.ai/> - increase productivity with no-code and GPT-4

Eluna - <https://www.eluna.ai/> a bunch of photography tools. Text to image generation, but remove background of existing photos and more.

Kaya - <https://kaya.chat/> Create and share a personal AI, trained on your knowledge

SQL Chat- <https://www.sqlchat.ai/> Chat-based SQL Client based on ChatGPT

**SheetAI** - <https://www.sheetsai.app/> Adding ChatGPT to spreadsheets to fill in data

Hoku- <https://www.heyhoku.com/> The smart AI health assistant that learns your preferences

Sincode- <https://www.sincode.ai/> Create SEO-optimized and plagiarism-free content

Piko- <https://pikojobs.com/> Fill out job applications in seconds using AI

HARD DATA, **SMART** DECISIONS

Pictory- <https://pictory.ai/> Create short, sharable branded videos from long form content

Voila - <https://www.getvoila.ai/> powered browser assistant to level up your productivity

**Worldly** - <https://wordplay.ai/> - Longform AI Writer enter keywords. Integrates with WordPress and you can schedule updates.

Cohesive - <https://cohesive.so/> similar tool with templates. Free to try, but not integrated with WordPress

**Imagica** - <https://www.imagica.ai/studio> - no code building blocks

**BuilderAI** - <https://www.builder.ai/> - quickly build apps by using components like other apps.

**Flawless** - <https://www.flawlessai.com/> - allows you to take videos done in English, that you have translated into another language...this changes the mouths to make it look like natively speaking that language.

GlassAI - <https://glass.health/ai/> - think WebMD but with real clinical data behind it.

**ChatGPT Plugins** – <https://openai.com/blog/chatgpt-plugins> - Game Changer for certain functions. Join wait list, read lower in the page to see examples and videos. Still relatively slow but works.

**Sqriblr** - <https://sqriblr.com/> allows for creating articles via ChatGPT and pulls in relevant images to illustrate the content from stock images.

**CraftMyJD** - <https://craftmyjd.nurturebox.ai/> rapidly creates job descriptions.

Alpha Watch - <https://www.alphawatch.ai/> tool used by hedge funds that allows for real language queries to find research and thoughts on companies.

**PaceAI** - <https://askpace.ai/> GPT solution specifically designed for technology professions. Create product requirements, User stories, roadmaps, etc.

**ClearGPT** - <https://cleargpt.ai/> Enterprise-grade platform offering state-of-the-art LLMs tailored to your data and running securely on your network to power Enterprise AI transformation

**Gling AI** – <https://www.gling.ai/> Automatically edits videos to cut them so that spaces, false starts, etc can easily be removed. Also, creates transcript.

**ChatGPT Skool** - <https://chatgptskool.com/> - Education class for all things GPT.

**DragGAN** – Link not released yet, but tool for editing to go beyond PhotoShop.

<https://hothardware.com/news/draggan-ai-tool-lets-you-click-and-drag-to-manipulate-images>

Job Interview Coach - <https://jobinterview.coach/> - practice your interview techniques with AI

FlowX.ai - <https://www.flowx.ai/> lets enterprises port legacy and newer software into a single place to build and run applications and services based around them

Patent Drop – <https://patentdrop.thedailyupside.com/> Scans 100s of patent applications a week to predict tech future.

SkipIt - <https://skipit.ai/> - . It summarizes youtube videos, PDFs, social media posts, and websites with just a link.

**Microsoft Fabric** - <https://www.cnbc.com/2023/05/23/microsoft-launches-fabric-including-copilot-for-power-bi.html> Won't be released until summer but for data analysis

**TableauGPT** - <https://www.tableau.com/blog/tableau-pulse-and-tableau-gpt> for data analysis

Note: on ChatGPT – there is the GPT Plus account. This allows you to use only on chat.openai.com - many of these other tools you can add the GPT API to leverage the LLM in those tools. This is charged separately on a per use basis plus whatever fee the tool company charges. But API prices are really modest for value received.
